PROJECTS

VOICE BASED EXTENSION FOR CONTROLLING BROWSER   23 May, 2023 - 30 Jun, 2023
Team Size: 4

Key Skills: HTML   CSS   Javascript   Extension

Project Link: https://github.com/Rohan88Dodake/control-voice-based-extension-for-controlling-browser

The voice-based browser extension integrates with a speech recognition service to convert spoken commands into text. The extension listens for specific keywords or phrases, such as "open new tab," "scroll down," or "search for X."

HOSPITAL MANAGEMENT SYSTEM

Key Skills: python   database

Project Link: https://github.com/Rohan88Dodake/hospital-management-system-.git

A hospital management system is a comprehensive software application designed to streamline and optimize various operations within a healthcare facility. It serves as a central hub for managing patient data, appointments, billing, pharmacy inventory, laboratory tests, and overall administrative tasks

CHATBOT RECOMMENDER SYSTEM

Key Skills: Python   API

Project Link: https://github.com/Rohan88Dodake/chatbot-recommender-system.git

A chatbot recommender system is a specialized type of conversational AI designed to provide recommendations, suggestions, or advice to users in a conversational manner
